Volume 2, Number 4

The Planetary Program

For all but three days, the planets form definitions in May, most of them in the Knowing circuit. The Sun and the planets closest to it, Mercury, Venus and Earth, are particularly prominent in Knowing and form short definitions with the slow planets farthest from the Sun – Uranus, Neptune and Pluto – which happen to be in the same circuit.

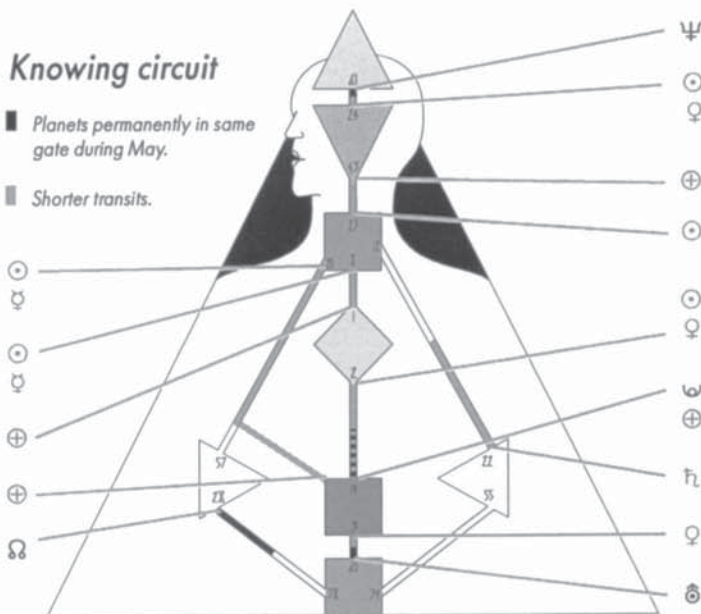

The Sun and Earth are always in the same gate and line around the same day each year. Because of this, they are very likely to have a similar effect each year on your design. They stay in a line for a little less than a day, so they are also good "line teachers" whereas the Moon, transiting two to three gates a day is a good "gate teacher."

The outer planets orbit slowly, remaining in gates for months to years at a time. They influence the collective evolution. Pluto, who gave us a taste of what we will be dealing with in 1996-98 by visiting line 1, the Bully, in gate 34, Power, retrograded back in Scorpio gate 14 mid-April, reminding us of power skills fueling the potential of the Self's receptivity in gate 2 and the possibility of creative self expression in channel 1-8, Inspiration. From May 4 to 9, Sun/Earth activate gates 1 and 2, defining the channel Beat, Keeper of Keys together with Pluto in gate 14.

Knowing circuit

- Planets permanently in same gate during May.
- Shorter transits.

Another improvement in the calendar

Line changes of the outer planets and the nodes are now symbolized with ■ to distinguish them from gate changes: ■

The Sun/Earth then transit into 43–23, one of three opposites that form channels. (The other two are 34–20 and 37–40.) The Structuring channel, 43–23, is in the Knowing circuit and is individual mental expression. 43, Breakthrough, conceptualizes unique individual insight that the 23, Splitting Apart, expresses through assimilation into the larger group. The challenge of this channel is that often the insight is so individual that it is of no value to the collective. However, this is a time when everyone has a mental definition and the chance to express their uniqueness. Read these lines in the Rave l'Ching.

Sun and Earth remain in the Knowing circuit as they transit into gates 8 and 14. Gemini activates several of the Throat gates, manifesting or speaking, and classic Gemini qualities. As the Sun moves into Gemini, it activates the second of the three opposites that form definitions, the 20–34, Charisma, the only channel that connects the Sacral center directly to the Throat, thereby making everyone a "doer." The keynote is "where thoughts must become deeds," which can be a difficult definition since awareness is not necessarily involved (depending on someone's design).

Speaking of the Sacral center in May, the classic month of spring fertility: all 9 of the gates of this center of sexual energy get activated during the month by either Venus, Mars, Earth, Jupiter or Pluto.

Saturn in direct motion leaves gate 22 for gate 36, Darkening of the Light, where it will remain until the end of August. Saturn, with its influence of discipline, restriction, rules, transiting in the gate of crisis, will be contributing to the collective change through feelings.

The Nodes of the Moon remain in gates 27 and 28 until mid-July. For May, the South Node remains in 27, Nourishment, line 4, Generosity, while the North Node is in 28, Preponderance of the Great, line 4, Holding On, part of the Struggle channel in the Knowing circuit. ■

HIV and Human Design

For research purposes New Sun Services is collecting the Designs of people who are HIV-positive. We'd appreciate every birth-data you can provide us with. Of course this data can be anonymous, but if possible, we would like additional information such as male/female, when and how infected, and if symptoms of AIDS have developed (and since when). ■
