## The Human Design System in America

The first week of October, Ra was in Taos, giving the third Advanced training in the US for those students who want to become Human Design analysts. It was a very good training and a great group of students. Once again, we got proof that the Human Design System is logical, learnable and transferable. And its exciting, mind-expanding, penetrating, clear and great fun.

At the end of 1993 when Ra first came to the US, New Sun Services America was established to promote the Human Design System and to assist analysts with the services they provide for their clients. Analysts are trained to do chart service and readings, and as such, represent the Human Design System to the public. Establishing standards

for these services to ensure quality for the client is of great concern to us and has been refined through experience in the last two years.

At the end of the Advanced training, an examination is given that shows a student's grasp of the mechanics and structure of the system. This year, a practice period has been instituted, during which new analysts may do untaped readings for a reduced fee. Analysts who want to be licensed by New Sun Services submit a taped reading for review. The reading is checked to make sure that all the crucial elements are included. Licensed analysts charge a minimum of \$120 and use personalized blank tapes for

# The Planetary Program in November

The Sun is in Scorpio going into Sagittarius, so the Earth is in Taurus going into Gemini. In traditional astrology, Scorpio rules the sexual organs, and if you look at the body graph pictured with the activations during the month, you see strong activation in the Sacral center. This also happens during May. In observing the influence of transits through Human Design, the centers activated are clues to what type of conditioning happens collectively. Because the Sun and Earth regularly activate the same gates at the same time each year, this is a very easy starting point for watching the flavors of the gates in relation to each other. The Sun and Earth, like the Moon, never are retrograde, so one can see the order of the gates as they influence all of us.

Like in May, there are two of the three pairs of opposite gates that make a definition with the Sun Earth transit: the 43-23 and the 34-20. Thanksgiving is always a time when everyone is a doer. 34-20 is the channel of Charisma, where thoughts must become deeds. It is always possible to act on one's thoughts, whether or not one is aware.

The Nodes of the Moon represent deeper changes in our collective pattern of destiny, where we are going and where we are coming from. This month on November 10, they change from 50/3, where the South Node in 3 defined the channel of Mutation with Uranus, a very significant influence on us all, to 32/42. The North Node remains in the Spleen and the South Node remains in the Sacral.

The big news is Pluto's transit into gate 34, where it will remain until December 97. Pluto, with its strong influence lasting years, is actually moving rapidly at this time in its

The planetary movements in November

orbit. It takes about 250 years to orbit the Sun, an average of approximately four years in a gate. Notice that Pluto will only activate gate 34 slightly longer than two years! It means that as it moves further away, its transits last longer. At the outermost point of its elliptical orbit, Pluto is up to eight years in one gate, while during recent years, it has been "speeding" through the gates, conditioning this period in evolution.

34, the gate of Power, gets definition on November 22

D = Direct, R = Retrograde

### Knowing circuit

■ Planets remaining in same gate during November.

■ Shorter transits.

with the Earth, followed by the Venus and Mars transits to gate 10. While in 34, Pluto will affect many Designs, as that gate is harmonic to three other gates. If you have 20, 10 or 57 in your Design, Pluto is going to define a channel for you for more than two years. Conditioning is nothing we can stop, but something we can recognize and therefore know that it is a teaching time that will pass.

Saturn remains in gate 22, line 2 for the month, finally in direct motion on November 20. Neptune remains in 61, beginning the month in definition with the Earth. Uranus remains in 60, undefined after November 10 while still pressuring all of us in the Root gate of Limitation. All three of these gates 22, 61 and 60 are in the Knowing circuit, as are many of this month's transits. Our processes at this time are individual.

# Health and Human Design

## 4. Regeneration

After the Throat, the Sacral is the most complex center and, in regard to health, the most important. The Throat can only manifest the "what" and "how" of something that is already there, while the Sacral is at the root of all processes, forming the Energy formats together with the Root center. It is the center of vitality, responsible for warmth, fertility and, at the core of all that, regeneration.

Many people deal with their vitality like humanity deals with planet earth: they exploit. They give productivity a higher value than life, driving in high gear, often until they crash. The premise for regeneration is the presence of power. The smallest amount of regained power needs to be invested into a complete regeneration, but too often it's wasted in a burst of activity, which is the best way to prepare the body for irreparable, degenerative illnesses. It is the cause of more and more modern ailments. Call it "excessive wear."

Gate 29 is an expansive power. It says "yes" with the entire power of the center of vitality, thereby having the tendency to exhaust itself, to wear out. It tries to catch at least two rabbits at once. Illness is the body's emergency brake to prevent further "saying yes." It says: for now you concentrate on one thing only, the regeneration of your body. The harmonic gate 46 in the G, center of the Self, is the flesh, the love of your own body and channel 29-46 is succeeding where others fail.

Gate 5 is part of the design of every single cell. It's the base on which the cell builds its energetic field, its pulse, its aura. A body is a collective of individual cells and there originates the protective energetic cover of the body we call aura. As the aura degenerates with use, it needs to be

*continued on page 4*

The design of a single cell in a human Body graph.

## HUMAN DESIGN SCHOOL BASIC TRAINING

### Sedona, AZ

Sat/Sun, November 11-12, 1995, 10-4

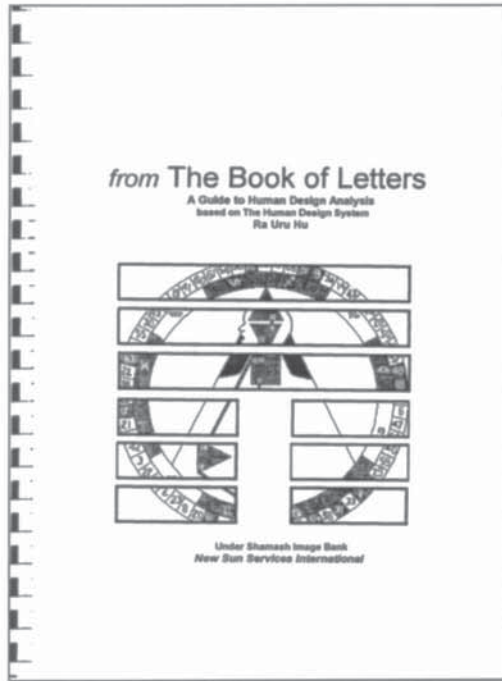

\$320

Free introduction lecture by Zeno, November 1, 7pm  
Sedona Public Library, Quiet Room

## Ra Uru Hu from The Book of Letters A Guide to Human Design Analysis

The long anticipated manuscript, written and illustrated by Ra and published by New Sun Services International, is now available in America. In this book, Ra shares his wealth of experience with eight years of Human Design analysis. It is an invaluable source of information, divided into a theoretical reference part and a practical section with guidance for analysis.

260 pages with as many illustrations

readings. They also work closely together with New Sun Services and its teachers and are encouraged to audit subsequent trainings to keep up with the growing body of knowledge. In the February issue of this newsletter we will publish a list of analysts licensed for 1996.

A personalized tape used by licensed Human Design analysts for readings.

essentially the same information from any analyst.

The Human Design System is learnable and can be used by anyone. A reading is not to develop a dependent relationship on an analyst, but rather, to begin one's own investigation in the individual process of self-knowledge, self-acceptance, self-love and self-mastery. It is about being awake and living who we are, rather than living out what we are not.

We encourage everyone to begin the process of self-discovery through Human Design with a reading. Remember, a reading is not a training in the mechanics of Human Design. If you want to learn more, plan on taking the training courses. As we approach the end of the year, we are looking at the training program and how to reach people who want to learn Human Design themselves. Look for more information in the next issue of the newsletter for the newest products and courses.

## Health and Human Design continued from page 3

regenerated – life is rhythm. The smallest possible beat of rhythm for regeneration is 24 hours: an entire vegetative cycle of the body. Every day the body needs to conserve energy for the regeneration process. A neglected and worn out aura is of course much more vulnerable than when daily regenerated.

Since the formation of new cells is an essential part of cellular regeneration, gate 60, the impulse-hexagram of a single cell, is important in this context. See "Health and Human Design," part 3, in last issue. Uranus will remain in gate 60 for most of 1996, followed by Neptune, who will stay

there through 1998. The impulsive and mutative energy on the cellular level will influence us for years to come. The South Node leaves the harmonic gate 3 (the receptor of the single cell) on November 10. On November 16 the transits of Jupiter, Mars and Venus through gate 5 end. In this context, an observation from my clinic: Many patients needed B vitamins and folic acids (both needed for the division of cells) lately. Energetic work and high potencies in homeopathy are beautiful devices, but can only influence what substantially is already there.
